TripBatch

TripBatch platform overview

Reservation, inventory, pricing and distribution software for airlines, tour operators and flight consolidators.

Reservation management

Keep the booking record in view as your team creates, changes or cancels a reservation.

Flight inventory

Manage seat availability, fare classes and allotments for scheduled and charter flights.

Dynamic packaging

Combine available travel components into one offer, or assemble a predefined itinerary for sale as a package.

B2B agency portal

Give travel agency partners a place to see and book the travel content you distribute to them.

Inventory → Pricing → Sales → Reservations

Follow a seat or room from its availability and price to the booking your team needs to service.
